SECTION 7: COLLABORATION & PARTNERSHIPS TABLE FOR 2019-2020 – 10 POINTS

Proposed Program and Community Outcomes INSTRUCTIONS

1 - Page Maximum (chart only)

For the purposes of this RFP, “collaboration” is defined as a mutually beneficial relationship where all partners and the community at large are positively impacted because of the relationship. The United Way for Cortland County Community Impact Committee has identified three classifications of collaborations that may effectively impact our community:

1. Shared “back-room” services **related to program delivery specifically, NOT agency-level operations** (examples could include the existence of a shared grant writer or bulk purchasing of materials to reduce operating costs)
2. Partnerships that function in an effort to share current best practices, increase services to clients, or limit duplication of services or efforts
3. Partnerships that function to collaboratively request funding from various sources
4. Support of United Way events and co-marketing of United Way for Cortland County

Some efforts will not be defined as a true collaboration. For example, a senior citizens program that simply uses the meeting space of a church does not represent a true collaboration. If, however, those senior citizens are assisting the church with their monthly soup kitchen in exchange for using meeting space, that is an example of a collaboration where both parties are receiving mutual benefit from the relationship. Scoring will favor strong inter-agency collaborations with appropriate examples of partnering efforts that demonstrate clear results to clients and/or limited service duplication.

Using the Collaborations & Partnerships Table on the next page, describe a **maximum of 3 specific, current (within the last 2 years), program-level** collaborative efforts or partnerships between your organization and other organizations, noting your organization’s role in these efforts. Please describe how the efforts of the collaboration have effected specific positive change in the lives of participants or community conditions, limited service duplication, or assisted in the sharing of best practices between organizations. Clearly state the benefits derived by your organization as well as by your collaborators. Please fully describe the value of the collaboration and the results of the collaboration as they relate to the focus area you are addressing.

- Do NOT include collaborations/partnerships that are not specific to a program. For example: sharing agency clerical staff, bookkeeping services, etc.
- If the program/project you are proposing for funding seeks to build a collaboration that does not already exist, please describe that partnership in detail, including expected participants and the goal of the partnership. You may also discuss involvement strategies that your program is using to target focus areas of need within the community.
- If this program is not currently in collaboration with another agency or program, please describe the rationale for providing this program on an individual basis. If there is a certain type of collaboration that would enhance the outcomes of your program, please indicate your plan to engage in that partnership.
- Please supply a contact name, phone number, and e-mail address for each agency/program involved in the collaborations or partnerships described above. Representatives of the United Way for Cortland County may conduct reference checks for verification purposes.

Please be sure to complete the documentation of United Way event participation and brand co-marketing.

See the *SAMPLE Collaboration and Partnerships Table* for examples.
